USOAP CMA ~~2020~~2024 Protocol Questions
Personnel licensing and training — PEL

Explanatory Note on the ~~2020~~2024 Edition of the Protocol Questions (PQs):

Revised on the basis of the ~~2017~~2020 edition, this ~~2020~~2024 edition of the USOAP CMA Protocol Questions (PQs) follows the ~~recommendations of~~ High-level Conference on COVID-19 (HLCC 2021) Recommendations (C-WP/15312 refers) regarding the ~~Group of Experts for a~~ integration of State Safety Programme Implementation Assessment (SSPIA) with traditional Universal Safety Oversight Audit Programme (USOAP ~~–~~) Continuous Monitoring Approach (CMA ~~Structured Review (GEUSR) (C-WP14757 refers))~~ activities that ~~was~~were approved by the Council of ICAO on ~~18 June 2018.~~4 March 2022 (C-DEC 225/7 refers). Some notable features of this ~~2020~~2024 edition of PQs are the ~~exclusion~~addition of ~~certain PQs that are not relevant~~ Safety Management System (SMS) related PQs to the ~~State safety oversight system or the accident~~areas of personnel licensing and ~~incident investigation system, reduction of the total number~~training (PEL), aircraft operations (OPS), airworthiness of ~~PQs (from 943 to 790~~aircraft (AIR), air navigation services (ANS), and ~~identification~~aerodromes and ground aids (AGA), as well as the addition of a ~~subset of Priority PQs.~~

~~At the same time, a separate~~ set of new PQs on State Safety Programme (SSP) ~~was developed in 2018 to assess the SSP implementation by States. These~~ as a new audit area.

The newly added PQs on SSP and SMS will have an undetermined status thus will not affect the Effective Implementation (EI) scores, until they are audited. Dedicated EI score for SSP ~~related PQs are posted on the "CMA Library" page of the USOAP CMA online framework (https://www.icao.int/usoap).~~

will be provided separately. Once States and relevant regional organizations are migrated to the ~~2020~~2024 PQ edition, the ~~Effective Implementation (~~EI~~) values~~ scores for ~~all their~~the USOAP activities on safety oversight, as indicated on the USOAP CMA online framework, will ~~also~~ be updated and adjusted accordingly.

The existing SSPIA PQs, including the self-assessments submitted and the assessment results for those States which had received SSPIAs, will be archived and can be made available upon request.

Introduction to the ICAO USOAP CMA Protocol Questions

Protocol Questions (PQs) are the primary tool used in the ICAO Universal Safety Oversight Audit Programme (USOAP) Continuous Monitoring Approach (CMA) for assessing the effective implementation of the eight critical elements (CEs) of a State's safety oversight system. Developed based on ICAO Standards and Recommended Practices (SARPs), Procedures for Air Navigation Services (PANS) and ICAO guidance material, the PQs are revised periodically by ICAO to reflect amendments to the ICAO provisions and reference documents.

The PQs are organized by audit areas and each PQ is associated with one of the eight CEs.

The ~~eight~~nine audit areas are as follows:

1) Primary aviation legislation and specific operating regulations (LEG);
2) Civil aviation organization (ORG);
3) Personnel licensing and training (PEL);
4) Aircraft operations (OPS);
5) Airworthiness of aircraft (AIR);
6) Aircraft accident and incident investigation (AIG);
7) Air navigation services (ANS); ~~and~~
8) Aerodromes and ground aids (AGA); and
~~8)~~9) State Safety Programme (SSP).

The eight CEs are as follows:

CE-1. Primary aviation legislation
CE-2. Specific operating regulations
CE-3. State system and functions
CE-4. Qualified technical personnel
CE-5. Technical guidance, tools and provision of safety-critical information
CE-6. Licensing, certification, authorization and approval obligations
CE-7. Surveillance obligations
CE-8. Resolution of safety issues

States are expected to use the PQs to conduct regular self-assessments and in this way, monitor the health of their aviation safety oversight system in a proactive manner.

A State is deemed to have *fully addressed* a PQ when it has implemented all the required elements of the PQ. This generates a *"satisfactory"* status of implementation for the PQ. If the State provides insufficient or no evidence of compliance with the elements outlined in the PQ, the PQ is assessed as *"not satisfactory"*. The State is required to develop and implement a corrective action plan (CAP) which fully addresses the associated PQ and all identified deficiencies.

The status of each PQ for a State is reflected in the USOAP CMA Online Framework (https://www.icao.int/usoap) and summarized in the activity report.

For reference purposes, the PQs are hereby presented in a table format. Each PQ is assigned a PQ number (e.g. 1.001), associated with a CE (e.g. CE-1), and supplemented by the relevant "Guidance for Review of Evidence" and "ICAO References". PQs shown in shaded rows can be assessed only in a USOAP CMA on-site activity, while Priority PQs are indicated as such (with "Yes" note) under the "PPQ" column.

For each PQ, the corresponding "Guidance for Review of Evidence" provides *an itemized list of elements* to be implemented by the State in order to address the PQ *satisfactorily*. When preparing for a USOAP CMA audit, States should use these listed elements, as applicable, to prepare the necessary supporting documentation and evidence for all PQs within the scope of the audit. When preparing for an ICAO validation activity, States should provide the necessary supporting documentation and evidence for all PQs, within the scope of the validation activity, that were previously assessed as *"not satisfactory"*.

Representatives of a State's civil aviation authority/investigation authority who participate in USOAP CMA activities should be familiar with each PQ and the related "Guidance for Review of Evidence" that will be addressed during the activities. All the information and evidence for each PQ that are to be provided to the USOAP CMA activity team should be prepared in advance.

The "Summary of Amendments" table provides a list of new, revised, merged and deleted PQs and a brief description of the amendments.

For the ~~2020~~2024 edition of the PQs, the total number of PQs is ~~790~~851 and a breakdown for each area is shown below:

	Area	Number of ~~2020~~2024 PQs
1	LEG	23
2	ORG	13
3	PEL	~~93~~100
4	OPS	~~126~~136
5	AIR	~~186~~198
6	AIG	84

General Guidelines for All Areas

Legislation, Primary Aviation Legislation and Specific Operating Regulations

The term "legislation" in the USOAP CMA Protocol Questions is used as a generic term to include primary aviation legislation and specific operating regulations.

The term "primary aviation legislation" in the USOAP CMA Protocol Questions includes any legislative provision and/or instrument promulgated and enforceable in the State (e.g. laws, acts, codes and international treaties).

The term "specific operating regulations" in the USOAP CMA Protocol Questions includes any binding regulatory provisions and/or instruments in the State (e.g. regulations, decrees, rules, and orders).

Processes and Procedures

Processes and procedures should clarify *who does what, how, when* (or *within what timeframes*) and *in coordination with whom*, as applicable.

Delegation of Duties and Tasks

When a State has delegated some of its safety oversight duties and tasks to another State or organization, the PQs on the delegation may have to be evaluated with the entity to which the duties and tasks have been delegated.

The State remains responsible for ensuring that the delegated duties and tasks are performed, at all times, by qualified individuals who ensure the implementation of the applicable legislation as well as the established processes and procedures. There should also be a system in place for conducting surveillance of the delegated duties and tasks and a process for the resolution of identified safety deficiencies.

Regulatory Function versus Service Provider Function

For a State which has not established a clear separation between its regulatory function and its service provider function or where the State Civil Aviation Authority (CAA) is both the regulator *AND* the service provider, the related PQs remain applicable.

Industry Visits

Industry visits are conducted to review and verify that the implementation of the established requirements, procedures and safe practices in each area complies with ICAO provisions and the State's applicable national legislation.

On-Site Activity

PQs that can only be assessed in a USOAP CMA on-site activity are shown in shaded rows in the PQ table.

Priority Protocol Questions (PPQs)

A subset of PQs is classified as Priority PQs or PPQs, which, if found not satisfactory, may indicate a lack of capability by a State to identify and/or resolve operational safety and fundamental accident investigation deficiencies effectively.

Annex

The term "Annex" in the USOAP CMA Protocol Questions stands for Annex to the Chicago Convention.

ICAO References

The ICAO references are classified as follows (shown here in alphabetical order): Chicago Convention (CC), ICAO Circular (Cir), ICAO Guidance Material (GM), Procedures for Air Navigation Services (PANS), Recommended Practice (RP), Regional Supplementary Procedures (SUPPS), and Standard (STD).

— — — — — — — —

Specific Guidelines for PEL

Based on the Chicago Convention, Annexes 1, 15 and 19 to the Chicago Convention and other relevant ICAO guidance documents, the PEL PQs are used to verify the establishment and management of a Licensing Section or Authority that is staffed with a sufficient number of technical and administrative personnel, all with clearly defined functions and responsibilities.

With respect to procedures for the amendment of specific operating regulations, filing of differences and publication of "significant differences" in the Aeronautical Information Publication (AIP), the establishment of these procedures is covered by the PQs on LEG, while implementation is covered by the PQs on PEL.

The training provided to PEL technical and administrative personnel may differ. In some cases, administrative personnel may not receive any training at all, which may be acceptable depending on their assigned duties and responsibilities. Whenever the Licensing Section or Authority designates people from the aviation industry or the service providers to evaluate licensed personnel (e.g. pilots designated within the airline industry), the PQs on training policies and programmes also apply.

Regarding the PQs on the licensing process, the auditor should take note of the types of licensing organization established. Some civil aviation authorities (CAAs) allocate licensing responsibilities to the Operations, Airworthiness or Air Traffic Control Sections within the CAA and so do not have a dedicated Licensing Section or Authority. In such a case, guidance and procedures should be available to all those involved in the licensing process.

For the conduct of medical assessments, the auditor should take note of whether the State has designated medical examiners or has delegated the assessment tasks to another organization. The State may also have all licensing activities handled by the Ministry of Transport (or other State authority) and all licensed personnel have to pass evaluations following Ministerial procedures. Each situation must be evaluated individually to determine how the State has established and implemented its licensing processes to effectively regulate, control and supervise these activities.

With respect to the approval of training organizations, it is customary for approval and surveillance responsibilities to come under the Operations Section of the CAA and in some cases, it depends on the type of training organization. An example is air traffic controller (ATCO) training, which may be under the State's responsibility. There are no PQs dedicated to the licensing of ATCOs. However, the existing PQs are intended to be applicable in general to all aviation licensing processes, including that for ATCOs.

SUMMARY OF AMENDMENTS – PEL PQs

Note 1.— The PQs are listed here sequentially for convenience. This may differ from their order on the USOAP CMA Online Framework or in the following document.
Note 2.— The PQs in the shaded rows require a USOAP CMA on-site activity. For the remaining PQs, no on-site activity is required in most cases.

STD A19 3.2.5 App 1, 5.1 GM Doc 9734, Part A 3.5 Doc 9859 8.3.8		CE-5
3.921	Has the State accepted the SMS of individual ATOs?	Review evidence of implemented procedures for accepting an SMS including the maintenance of SMS operational records. Note to the auditor: This PQ is only applicable to approved training organizations (ATOs) in accordance with Annex 1 that are exposed to safety risks related to aircraft operations during the provision of their services.	STD A19 4.1 App 1, 6 App 2 GM Doc 9734, Part A 3.6 Doc 9859 8.4.6 & 8.4.7		CE-6
3.925	Does the State ensure that the ATOs identify hazards, assess identified safety risks, and mitigate them appropriately?	Verify that the State ensures that the ATOs: 1) maintain a process to: a) identify hazards associated with their aviation products or services; b) assess safety risks; and c) mitigate safety risks. 2) actively identify hazards, assess safety risks and mitigate them appropriately. Notes to the auditor: 1) This verification needs to be reviewed during the industry visit.	STD A19 App2, 2.1 & 2.2 GM Doc 9859 9.4.4 & 9.4.6		CE-7

		2) This PQ is only applicable to approved training organizations (ATOs) in accordance with Annex 1 that are exposed to safety risks related to aircraft operations during the provision of their services.			
3.929	Does the State ensure that safety performance indicators and targets established by ATOs are acceptable to the State?	1) Review the State's mechanism for accepting individual ATOs safety performance indicators (SPIs) and targets (when applicable) to verify that proposed SPIs and respective targets (as applicable), are developed in a manner that supports the effort to meet their safety objectives, and are formulated in a manner to ensure that they are specific, measurable, achievable, relevant and timebound. 2) Verify that the State ensures that the ATOs proposed SPIs are reviewed and accepted as part of the SMS acceptance. Notes to the auditor: 1) SPIs acceptance may also be done later in the implementation process. 2) This verification needs to be reviewed during the industry visit. 3) This PQ is only applicable to approved training organizations (ATOs) in accordance with Annex 1 that are exposed to safety risks related to aircraft operations during the provision of their services.	STD A 19 App 2, 3.1 RP A19 3.3.2.2 GM Doc 9859 4.3.3 & 8.4.7.		CE-6
3.933	Does the State ensure the ATOs monitor their safety performance?	Verify that the State has established and implemented a mechanism to ensure that the ATOs periodically review their safety performance including the means to: 1) validate the effectiveness of safety risks controls; 2) validate the identification of changes that may affect the level of safety risks associated with their aviation products or services; and 3) validate the identification and management of the safety risks that may arise from those changes.	STD A 19 App2, 3.1, 3.2 & 3.3 GM Doc 9859 8.5.4, 9.5.4, 9.5.5 & 9.5.6		CE-7
